Your Virtual Chief Information Security Officer will be responsible for:

- ✓ Overall IT security, provision of policies and guidance
- ✓ Risk analysis of the business
- ✓ Regular vulnerability audit reporting
- ✓ Attendance at management and board meetings
- ✓ Telephone availability for general information security related discussion
- ✓ Advice on incident response and planning
- ✓ Ongoing information security support

Benefits of our Virtual Chief Information Security Officer?

Our Virtual Chief Information Security Officer service will be an active member of your board, our information security consultant will be available at key business meetings and be responsible for driving positive change to help your business achieve its information security goals.

The **key benefits** of our service includes:

- ✓ Cost effective solution to having an employed full-time member of staff with less overheads and HR issues
- ✓ Independent provider to help scan and identify vulnerabilities within the computer system
- ✓ Development of your security roadmap to help fall inline with business goals
- ✓ Independent consultancy and technical advice at all levels from operations up to board room
- ✓ Informed decision making and strategic guidance based upon business goals and growth

How our Virtual Chief Information Security Officer service can help you:

Protection against cyber threats

Identify and reduce the risks within the business can help protect against cyber related threats.

Risk mitigation

Our service will analyse risks within the business and report upon the findings. By working with the business you can help mitigate the risks.

Independent vulnerability scanning

By having an independent company performing regular vulnerability scanning and reporting, you are confident that security issues will be picked up quickly.

Strategic decision making

Capable of looking at the bigger picture when it comes to information security. Looking for weaknesses to help protect the business.

Scale and growth

Our service can scale up or down with your needs as your business demands it.

What makes our service **unique**?

Our security consultants work with you, we don't dictate what you should and shouldn't be doing.

Our security consultant will be assigned to your business and will get to understand your needs and help to achieve your goals.

Not only do our information security consultants understand security, but they also have a background in IT from several areas, they know how networks and business work and help your business succeed.

Our security consultants have experience in ISO 27001 as well as Cyber Essentials and IASME Governance standard, allowing their experience and knowledge to be passed to your staff.

How much does it cost?

Starting from just **£1,000 + VAT per month**, you will have access to one of our security consultants who will be assigned to your business and work at an executive level.

How do I apply?

Contact TeraByte about your requirements, one of our security consultants will walk through the service with you and confirm the pricing. Once you are happy, the necessary paperwork will be sent over for you to read and sign.

Once signed, one of our security consultants will be assigned to your business and we'll start understanding how your business is ran and what you need to do, to move forward.
